

Supply chain security policy

Vision

To increase the competitive advantage of the company by ensuring the security of the supply chain and delivery of the quality products to the customers in time.

Mission

Identify, assess and mitigate risks in the supply chain in order to ensure supply chain security.

We commit to:

1. Identify, assess and reduce risks arising in the supply chain by assessing organisational, technical, technological, economic, human and other risks related to the purchase of materials, design, manufacturing and product delivery.
2. Continually improve the supply chain security management system in accordance with the requirements of ISO 28000:2007 standard.
3. Continually follow changes in the laws, regulations and other relevant requirements of the Republic of Lithuania and apply them in the activities of the company.
4. Encourage the company's employees and other stakeholders to participate in ensuring the safety of the supply chain and reducing risks in the supply chain.
5. Apply the best practices in the field of security management in the company's activities.
6. Allocate the necessary resources to ensure the security of the supply chain.
7. Continually improve the qualifications of employees in the field of supply chain security management and risk management.

Justinas Berneckis
