

## Quality policy

ROL is an advanced engineering and manufacturing company offering products and services of quality, delivered with integrity, by people who work passionately, with respect for the communities and the environment we live in.

We want our customers to be confident that we will meet their requirements and expectations.

We want our suppliers to recognize the responsibilities we have, and to assist us in maintaining these at all times.

We shall deliver all this by:

- Using “state of the art” technology
- Maintain and develop skilled and passionate people
- Establishing partnership with world-class suppliers
- Continually improving our management system
- Complying with stakeholder’s requirements
- Complying with our sustainability goals
- Work within our Code of Conduct (CoC)

This Quality Policy was reviewed and endorsed by the Board of Directors of ROL AB in Jönköping, Sweden on 23th August 2018.

**Per-Olof Svensson**  
CEO, ROL AB
